TEACHING INTERESTS:

Lecturer Reese's teaching is grounded in inclusive, evidence-based instructional practices that support diverse learners, with particular emphasis on students with mild intellectual and developmental disabilities (IDD) in postsecondary education. Reese is committed to promoting students' academic, vocational and social-emotional growth through accessible and engaging learning experiences.

As a certified Global Career Development Facilitator, Lecturer Reese is especially interested in helping students identify career goals and develop essential workforce skills through internships, volunteer experiences, and employment opportunities.

Lecturer Reese fosters critical thinking and complex problem-solving skills by incorporating Project-Based and Problem-Based Learning that immerse students in authentic, real-world scenarios. Reese's teaching empowers students through hands-on, inquiry-driven projects designed to build the practical and transferable skills most valued by today's employers.

With a passion for student development and curriculum design, Lecturer Reese strives to create meaningful learning environments that prepare students for both professional success and lifelong growth.
